

Using animated icons is really simple, you're just gonna need to paste the SVG code of the icon on your page. To accomplish that, go a head and download the needed icon pack from linea.io (<http://linea.io>) and open the downloaded pack. You're gonna need to find the icon in .svg format and open that with a text/code editor of your choice, then just paste the code in the .services-section element.

An example of how it might look:

```
<svg id="Layer_1" version="1.1" xmlns="http://www.w3.org/2000/svg"
xmlns:xlink="http://www.w3.org/1999/xlink" x="0px" y="0px" width="150px"
height="150px" viewBox="0 0 64 64" enable-background="new 0 0 64 64"
xml:space="preserve">
